

# 2. What's New

Part of the **Access Transparency** manual — see also [1. Introduction](#), [3. Scope](#), [4. Setup](#), [5. Usage](#), [6. Troubleshooting](#).

## Unreleased

### New

- [5.1 Viewing a User's Access Transparency tab](#) — redesigned to match GLPI's native Historical tab with clearer columns (ID, Date, User, Event type, Field, Update), a real page-by-page navigator, native-styled Filter/Export buttons, and human-readable event-type labels instead of raw internal names.
- [5.2 Viewing document access](#) — new "Access Transparency" tab on Document pages showing which users opened that document, with the same filtering, pagination, and CSV export as the User tab.

### Fixed

- User's Access Transparency tab no longer fails with a database error when that user has activity history.
- Profile's "Access Transparency" tab now displays the correct icon (window icon).
- Configuration page title shortened and "Log retention" field styling improved to match the rest of the page.

“ Generated for **Access Transparency 1.2.0-beta3** on GLPI 11.0.8 — 2026-08-24.
