

4. Setup

Part of the *More Groups* manual — see also [1. Introduction](#), [2. What's New](#), [3. Scope](#), [5. Usage](#), [6. Troubleshooting](#).

4.1 Installation

Standard plugin install: drop it in `plugins/`, install and activate from **Setup > Plugins**.

4.2 Configuration

There is nothing to configure. Once activated, the **Deactivated users** panel appears automatically on every Group's Users tab, for every user who can see that tab.

☐	USER	GROUP	DYNAMIC	MANAGER	DELEGATEE	ACTIVE	Filter

☐	Fernández Diego			

4.2.1 Automatic actions

None.

4.3 Permissions

No dedicated right is added. Deactivating or activating a member requires the native **Group_User: Update** right, and access to the member's group is still subject to GLPI's normal entity restrictions — enforced by a `Group::can($groups_id, READ)` check on the target group, in both the massive action path (`inc/group.class.php`) and the Symfony controller (`src/Controller/GroupActionController.php::canAccessGroup()`).

Generated for **More Groups 2.0.1** on GLPI 11.0.8 — 2026-08-21.

Revision #16
