

Asset handover

The Asset Handover section reads the assets a user has and assigns new ones. It opens from the side menu.

1. Choose how to assign

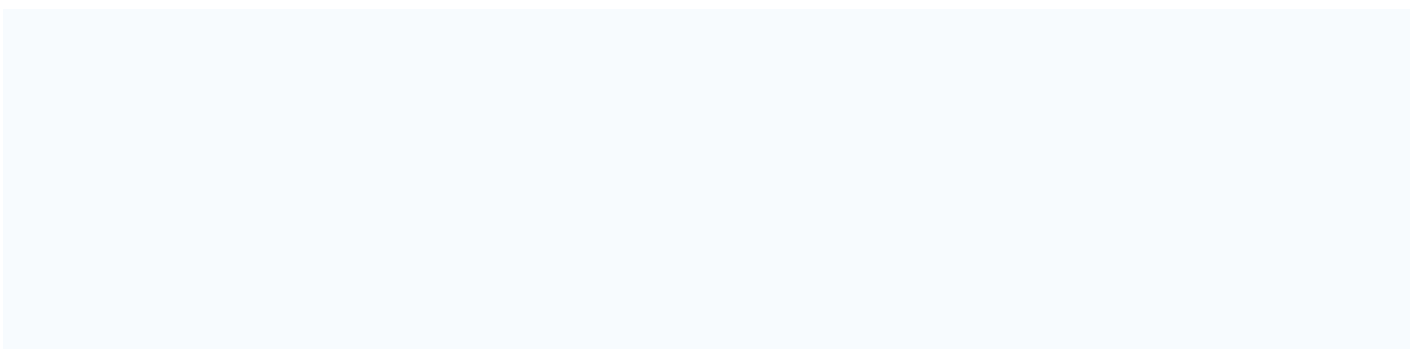

The screen offers two options:

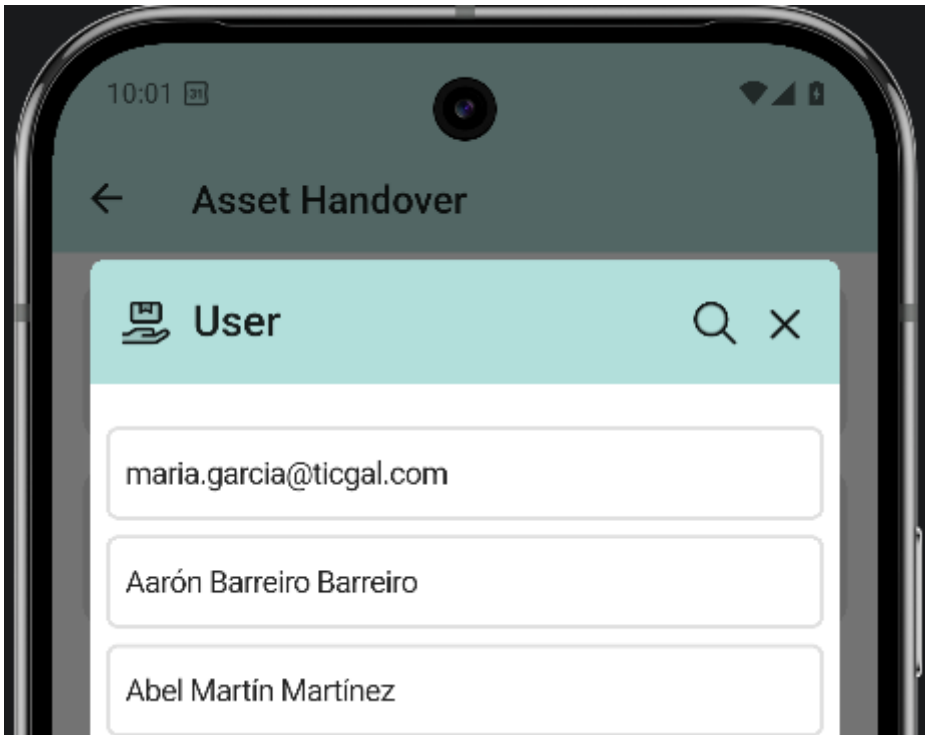

1. **Read QR code** scans a QR code to identify the user.
2. **Select user** opens the user list to pick the user who receives the asset.

2. Select the user

The user list opens. Tap the user who receives the asset.

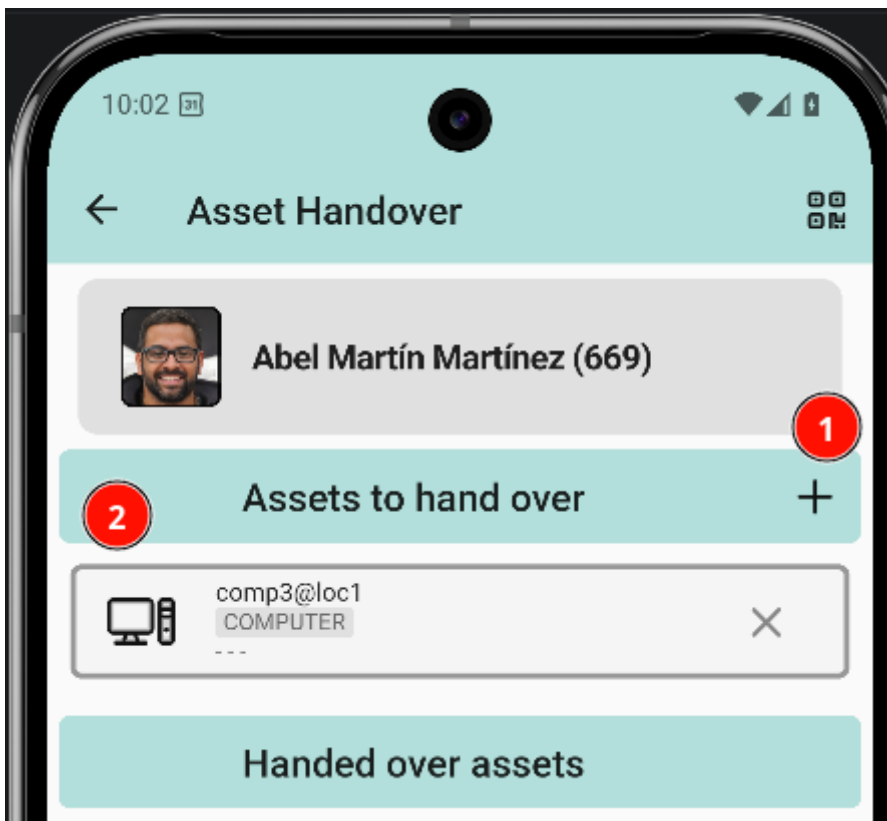

3. User profile

Tapping a user opens their profile, where the assets of that person can be read and new ones assigned. Two actions are available:

- **Add new assets** opens the asset list to assign a new asset.
- **Asset list** shows the assets the user already has.

4. Pick the asset

The asset list opens with the available assets. Tap the asset to assign.
